

Investment Policy

Qualion Finance Bond-R (The "Sub-Fund") seeks to exceed the return of the Iboxx Euro Corporate Index over the long-term by investing principally in government and corporate bonds (direct lines or investment funds) that are denominated in Euro and presenting a certain rating. The Sub-Fund may use derivatives to reduce its exposure to various investment risks (hedging) and for efficient portfolio management and to seek investment gains. The Sub-Fund is managed actively and the portfolio's composition may deviate from the benchmark.

Fund Manager Commentary

This month two bonds from ABN AMRO and BFCM were purchased while a bond from Bekaert was sold. In November riskier fixed income securities continued generally to outperform investment grade bonds, but even benchmark government bonds had positive returns this month. The German bund 10 years gained +1.9%, its yield decreasing to 1.93% from 2.14% one month earlier. Investment grade corporate bonds in euro increased by +2.8% while the riskier high yield index increased by +3.5%. Subordinated financials and corporate hybrid bonds in euro both gained +3.2% and +2.7% respectively. In the US, the 10-year Treasury bond increased by +3.8% its yield decreasing to 3.6% from 4.06% one month earlier. US corporate bonds gained +4.8% while high yield bonds gained +2.2%. The USD lost -4.2% against the EUR and finished at 1.03.

Financial subordinated bonds are unsecured bonds from financial issuers (banks, insurance companies...) that rank below other more senior securities of that issuer with respect to claims on its assets or earnings.

Corporate hybrid bonds are unsecured bonds from corporate issuers (industrial, commercial companies...) that rank below other more senior securities of that issuer with respect to claims on its assets or earnings.

Credit spreads refers to the difference in yield between a benchmark bond (usually German government bonds for EUR bonds or U.S. Treasury bonds for USD assets) and another debt security of the same maturity but different credit quality.

Investment grade corporate bonds are bonds that have a relatively low risk of default and are issued by a company.

High Yield bonds are bonds that offer higher interest rates and are issued by issuers with a low credit rating.

Risk and Reward Profile

Scale running from 1 (lower risk) to 7 (higher risk). The risk/reward rating above is based on medium-term volatility (actual or estimated variations in the Sub-Fund's share price over five years). Going forward, the Sub-Fund's actual volatility could be lower or higher, and its rated risk/reward level may be changed.

Additional information on possible risks in case of unusual market conditions

Counterparty risk : The Sub-Fund could lose money if an entity with which it does business becomes unwilling or unable to honour its commitments to the Sub-Fund.

Default risk : A bond may lose part or its entire value if the issuer is unable to pay interest or repay principal on schedule.

Derivatives risk : Certain derivatives could increase Sub-Fund volatility or expose the Sub-Fund to losses greater than the cost of the derivative.

Liquidity risk : Certain securities could become hard to sell at a desired time and price.

Management risk : Portfolio management techniques that have worked well in normal market conditions could prove ineffective or detrimental during unusual conditions.

Operational risk : In any market, but especially in emerging markets, the fund could lose some or all of its money through a failure in asset safekeeping or through fraud, corruption, political actions or any other unexpected events.
