

Investment Policy

Qualion Finance Equity-AI ("the Sub-Fund") seeks long-term capital appreciation through investment in equities. The Sub-Fund will be investing mainly in large capitalisation shares from the European Union, United Kingdom, Switzerland and the United States of America (51-100%). The Sub-Fund may also invest in equities from other countries, including emerging markets (0-49%). The Sub-Fund may also invest in units or shares of other UCITS and/or UCI (0-10%). The Sub-Fund may use derivatives to reduce its exposure to various investment risks (hedging) and for efficient portfolio management, and to seek investment gains.

Fund Manager Commentary

In April, the position in the Swiss pharmaceutical company Roche was completely sold in order to decrease the fund's overall exposure to the healthcare sector. This month, global equity markets performed strongly as did most risky assets around the world. In Europe the Stoxx Europe 600 gained +3.2% while in the US, the S&P500 even jumped by +3.9%. Once again, emerging markets were also positive, yet returned less than their more developed counterparts. The MSCI Emerging Markets increased by +2%. The USD remained virtually unchanged (+0.01%) against the EUR and finished the month at 1.122.

Risk Indicator

Scale running from 1 (lowest risk) to 7 (highest risk). The risk indicator is a Synthetic Risk and Reward Indicator (SRRI), as prescribed by the European Securities and Markets Authority (ESMA). The risk category is an indicator of the risk linked to an investment in a UCITS or a compartment. Any change in the risk category will be specified in the periodic reports of the UCITS. For more information visit www.esma.europa.eu.

Additional information on possible risks in case of unusual market conditions

Counterparty risk : The Sub-Fund could lose money if an entity with which it does business becomes unwilling or unable to honour its commitments to the Sub-Fund.

Default risk : A bond may lose part or its entire value if the issuer is unable to pay interest or repay principal on schedule.

Derivatives risk : Certain derivatives could increase Sub-Fund volatility or expose the Sub-Fund to losses greater than the cost of the derivative.

Liquidity risk : Certain securities could become hard to sell at a desired time and price.

Management risk : Portfolio management techniques that have worked well in normal market conditions could prove ineffective or detrimental during unusual conditions.

Operational risk : In any market, but especially in emerging markets, the fund could lose some or all of its money through a failure in asset safekeeping or through fraud, corruption, political actions or any other unexpected events.
