

## Investment Policy

Qualion Finance Bond-R (The "Sub-Fund") seeks to exceed the return of the Iboxx Euro Corporate Index over the long-term by investing principally in government and corporate bonds (direct lines or investment funds) that are denominated in Euro and presenting a certain rating. The Sub-Fund may use derivatives to reduce its exposure to various investment risks (hedging) and for efficient portfolio management and to seek investment gains.

## Fund Manager Commentary

This month, the position in the Aegon perpetual bond was increased and the position in the Barclays perpetual was completely sold. The floating rate security from EDF was tendered for repurchase by its issuer.

In December, safer fixed income investments continued to suffer from the surrounding "risk on" environment, while riskier bonds performed well.

The German bund 10 years lost an impressive -1.7%, its yield increasing to -0.19% (from -0.36% end of last month). Investment grade corporate bonds in euro remained flat with -0.1%. European high yield bonds gained however +1%. Subordinated financials and corporate hybrid bonds gained +0.5% and +0.9% respectively. The 10-year US Treasury bond fell by -1.1%, its yield increasing to 1.92%. US corporate bonds increased by +0.3%, while US high yield bonds gained +2%. The USD lost however a full -1.9% against the EUR and finished the month at 1.123.

### Risk and Reward Profile

Scale running from 1 (lowest risk) to 7 (highest risk). The risk indicator is a Synthetic Risk and Reward Indicator (SRRI), as prescribed by the European Securities and Markets Authority (ESMA). The risk category is an indicator of the risk linked to an investment in a UCITS or a compartment. Any change in the risk category will be specified in the periodic reports of the UCITS. For more information visit [www.esma.europa.eu](http://www.esma.europa.eu).

## Additional information on possible risks in case of unusual market conditions

Counterparty risk : The Sub-Fund could lose money if an entity with which it does business becomes unwilling or unable to honour its commitments to the Sub-Fund.

Default risk : A bond may lose part or its entire value if the issuer is unable to pay interest or repay principal on schedule.

Derivatives risk : Certain derivatives could increase Sub-Fund volatility or expose the Sub-Fund to losses greater than the cost of the derivative.

Liquidity risk : Certain securities could become hard to sell at a desired time and price.

Management risk : Portfolio management techniques that have worked well in normal market conditions could prove ineffective or detrimental during unusual conditions.

Operational risk : In any market, but especially in emerging markets, the fund could lose some or all of its money through a failure in asset safekeeping or through fraud, corruption, political actions or any other unexpected events.
