

Investment Policy

Qualion Finance Bond-R (The "Sub-Fund") seeks to exceed the return of the Iboxx Euro Corporate Index over the long-term by investing principally in government and corporate bonds (direct lines or investment funds) that are denominated in Euro and presenting a certain rating. The Sub-Fund may use derivatives to reduce its exposure to various investment risks (hedging) and for efficient portfolio management and to seek investment gains. The Sub-Fund is managed actively and the portfolio's composition may deviate from the benchmark.

Fund Manager Commentary

This month, the euro corporate bonds from JP Morgan, AB Inbev and BHP Billiton were sold while the existing bond from Renewi was increased. The existing Aegon Perpetual bond has also been increased. In November, the joint announcements of successful Covid 19 vaccine trials by Pfizer and BionTech as well as Joe Bidens' victory at the presidential elections in the US literally catapulted risky assets markets. Safe haven bonds in EUR retreated slightly on so much optimism. The German bund 10 years lost -0.6%, its yield slightly increasing to -0.57% from -0.63% one month ago. Investment grade corporate bonds in euro gained +1% while the riskier high yield index even jumped by +4%. Subordinated financials and corporate hybrid bonds both increased by +2.3% and +3.2% respectively. In the US, the 10-year Treasury bond gained +0.4%, its yield slightly decreasing to 0.83% from 0.88% last month. US corporate bonds increased by +2.6%, while US high yield bonds gained +3.8%. The USD lost -2.6% against the EUR and finished the month at 1.196.

Risk and Reward Profile

Scale running from 1 (lowest risk) to 7 (highest risk). The risk indicator is a Synthetic Risk and Reward Indicator (SRRI), as prescribed by the European Securities and Markets Authority (ESMA). The risk category is an indicator of the risk linked to an investment in a UCITS or a compartment. Any change in the risk category will be specified in the periodic reports of the UCITS. For more information visit www.esma.europa.eu.

Additional information on possible risks in case of unusual market conditions

Counterparty risk : The Sub-Fund could lose money if an entity with which it does business becomes unwilling or unable to honour its commitments to the Sub-Fund.

Default risk : A bond may lose part or its entire value if the issuer is unable to pay interest or repay principal on schedule.

Derivatives risk : Certain derivatives could increase Sub-Fund volatility or expose the Sub-Fund to losses greater than the cost of the derivative.

Liquidity risk : Certain securities could become hard to sell at a desired time and price.

Management risk : Portfolio management techniques that have worked well in normal market conditions could prove ineffective or detrimental during unusual conditions.

Operational risk : In any market, but especially in emerging markets, the fund could lose some or all of its money through a failure in asset safekeeping or through fraud, corruption, political actions or any other unexpected events.
